Dear Hiring Team,

I am applying for the Field Project Officer — Technology & Digital Integration role at AFOSI (Kilifi).

For about three years at PATH I have delivered technology-enabled work on donor-funded health programs: digital systems support, data and reporting tools (including DHIS2 and project databases), and digital skills training for more than 80 staff. I coordinate day-to-day with facility and program teams, keep digital tools usable in the field, and turn messy operational needs into clear workflows, SOPs, and dashboards.

I have also built and owned a county health systems operations platform that tracks facility reporting, EMR status, IT assets, and incidents — product ownership from requirements through delivery. I hold a BSc in Applied Computing (KCA University) with Artificial Intelligence coursework, plus certifications including CCNA, Azure Fundamentals (AZ-900), Google IT Support, GitHub Professional, and Microsoft Data Analysis. I learn new digital tools quickly and I explain them in plain language.

I am ready to relocate for Kilifi field work and to support AFOSI’s digital integration, skills, and e-entrepreneurship goals with disciplined delivery and reporting.

Thank you for your consideration.

Yours faithfully,

Meshack Ariri
