3+ yrs	~98%	120+	EMR
HOSPITAL-GRADE ICT	AVAILABILITY	USERS TRAINED	AND NETWORK

PROFILE

IT lead with 3+ years running all ICT functions in a health organisation: LAN, WAN, servers and virtual machines, endpoints, EMR and enterprise applications, daily monitoring, backups and security, at about 98% availability. I document, automate where it helps, train staff, mentor junior ICT, and manage vendors and IT resources. CCNA. BSc Applied Computing.

Deployment and provisioning LAN, WAN, network segments, Internet, remote access; install and rebuild servers; hardware, peripherals, services, settings, directories, storage; desktops, laptops, Chromebooks, tablets, printers, routers, switches, firewalls, phones, smartphones and software; deployment and configuration documentation; PowerShell/Bash automation

Accounts, security, privacy Create, update, disable and delete user accounts and access permissions (Active Directory, Entra ID); security monitoring to identify and remediate risks or intrusions; OS security patches, updates and upgrades; data backup and privacy; acceptable AI use under IT security and data privacy rules

Hospital systems and backups Enterprise applications: communications, collaboration, EMR (KenyaEMR/TaifaCare, DHIS2), inventory management, human resources, financial management and accounting access; physical servers, virtual machines, WiFi access points, operating systems; automated daily backups to local, external network-attached and offsite cloud storage

Lead, training, resources Leadership, mentoring, coaching and day-to-day management of junior ICT / IT Officer; hospital staff training on hardware, software and systems; IT budgets, resources and vendor relationships

EXPERIENCE

Health Informatics / HMIS Officer

Mar 2025 to Present

PATH · Kenya (health, multi-site)

- Support all IT functions: enterprise applications (communications, collaboration, EMR, inventory management, human resources, financial management and accounting access), physical servers and virtual machines, network and security/access administration, and information backup, management and protection at over 98% availability.
- Daily system monitoring of hardware, server resources, systems and key processes: review logs, verify scheduled backup jobs, apply OS security patches, updates and upgrades, and recover from hardware or software failures with status updates to users.
- Guide staff on acceptable AI use under security and data privacy rules; mentor and coach junior ICT on the queue; keep IT resources, vendor relationships and budget inputs current.

ICT Associate

Jan 2024 to Mar 2025

PATH · Kenya (health, multi-site)

- Deployed and supported LANs, WANs, network segments, Internet and remote access; installed and rebuilt servers; configured desktops, laptops, Chromebooks, tablets, printers, routers, switches, firewalls, phones, smartphones and software to operational standards.
- Created, updated, disabled and deleted user accounts and permissions; ran security monitoring; kept automated daily backups to local, network-attached and offsite cloud storage and verified they completed.
- Wrote deployment, installation and configuration procedures; automated repeat admin tasks where possible; trained 80+ staff; coordinated vendors and IT spend as the main ICT point of contact.

ICT Intern

Apr 2023 to Dec 2023

PATH · Kenya

- Supported LAN and WAN, imaging, printers, VoIP and server-room diagnostics; logged tickets and wrote procedures.

EDUCATION **BSc, Applied Computing · KCA University, Nairobi · November 2023**
Cybersecurity and Digital Forensics. Coursework: Ethical Hacking, Digital Forensics, Data Protection, Cloud Computing.
