3+ yrs	~98%	Multi-site	CCNA
LAN/WAN OPERATIONS	UPTIME VS SLA	CORPORATE NETWORK	AND AZ-900

PROFILE

Network professional with 3+ years running multi-site corporate LAN/WAN for PATH, a global health organisation, holding network and business systems at roughly 98% uptime against agreed service levels. I monitor performance, logs and events for proactive remedial support; own firewall policy, signature and patch updates, access control and security policy; and maintain disaster recovery and business continuity. CCNA certified, with TCP/IP, IP telephony and firewall appliances. BSc Applied Computing, specialising in cybersecurity.

Network engineering TCP/IP, LAN and WAN, routing and switching, VLAN design and segmentation, VPN, IP addressing, DNS and DHCP, wireless, inter-site links, performance and capacity management against business SLAs

Devices and platforms Cisco and Cisco Meraki access points, switches and MX security appliances; MikroTik; Fortinet FortiGate firewall appliances; IP telephony (3CX); structured cabling; Windows Server 2016-2022 and Linux in multi-platform environments

Monitoring and security Network monitoring, logs and events for proactive remedial support; firewall policy, signature updates and patch releases across ICT assets; device access and control policies, security and storage policies, endpoint protection, MFA, vulnerability reporting; modern threat awareness

Continuity and delivery Disaster recovery, backup policy and business continuity; network and architecture documentation, full ICT component inventory; ITIL and SLA, incident response and root cause analysis; project delivery for network setup and migration, vendor and ISP management, mentoring

EXPERIENCE

Health Informatics / HMIS Officer

Mar 2025 to Present

PATH · Kenya (multi-site)

- Keep the corporate network and the business systems on it performing consistently at over 98% uptime against agreed service levels, covering inter-site links, addressing, and connectivity to cloud and partner-hosted platforms.
- Maintain disaster recovery and business continuity for Windows and Linux platforms: backup policy, encryption, patching and restore testing, and document architecture components and configurations.
- Coordinate infrastructure and integration projects across multi-disciplinary teams and external vendors, from requirements through implementation plans to handover documentation.

ICT Associate

Jan 2024 to Mar 2025

PATH · Kenya (multi-site)

- Installed, supported and maintained network devices across sites: Cisco Meraki switches, access points and MX security appliances, routers, firewalls and IP telephony, attending to system failures and coordinating resolution.
- Monitored network performance, logs and events and moved the team to proactive remedial support, sustaining roughly 98% availability for 120+ users and cutting incident response time about 25% under ITIL workflows and SLA tracking.
- Developed and enforced device access and control policies, firewall rules, VLAN segmentation, VPN access, endpoint protection, MFA and patch and signature updates in line with security policy.
- Maintained the full ICT network component inventory and documentation, and ran ISP and vendor evaluations.

ICT Intern

Apr 2023 to Dec 2023

PATH · Kenya

- Supported LAN and WAN, routers, switches, cabling and server-room diagnostics with senior engineers.

EDUCATION **BSc, Applied Computing · KCA University, Nairobi · November 2023**
Cybersecurity and Digital Forensics. Coursework: Ethical Hacking, Digital Forensics, Data Protection, Cloud Computing. Capstone: designed and implemented a secure office network (VLANs, Active Directory, backup and disaster recovery).

CERTIFICATIONS CCNA · AZ-900 · Google IT Support · IBM Technical Support · GitHub Professional
