CCNA	3+ yrs	~98%	Multi-site
CERTIFIED	NETWORK OPERATIONS	AVAILABILITY	INTER-SITE LINKS

PROFILE

CCNA-certified network administrator with about three years running multi-site network operations for PATH, a global health organisation, holding clinical and enterprise systems at roughly 98% availability for 120+ users. I cover LAN and WAN, inter-site links, wireless, VPN, VLAN segmentation, IP telephony, firewalls and monitoring. Healthcare taught me that network downtime is a patient-safety event. Bachelor's degree in Applied Computing, specialising in cybersecurity.

Network operations Availability, performance, capacity and integrity of local and wide area networks (LAN/WAN), internet and inter-site links, routing and switching, VLAN segmentation, TCP/IP, DNS and DHCP, VPN, IP addressing and uptime reporting
Platforms and wireless Cisco Meraki access points, switches and security appliances; MikroTik; Fortinet FortiGate; structured cabling; multi-AP staff and guest Wi-Fi; IP telephony and VoIP (3CX); onboarding and segmentation of clinical and IoT devices
Security and resilience Firewall rules and policy, segmentation, MFA and identity, access control, endpoint protection, patch management and vulnerability reporting alongside cyber security functions; backups and disaster recovery, cloud and partner-hosted connectivity
Service and documentation ITIL practice and SLA, Freshdesk and Zoho Desk, incident response and RCA, Grafana monitoring; resilient, well documented and scalable network design; SOPs, ISP and vendor management, user training

EXPERIENCE

Health Informatics / HMIS Officer

Mar 2025 to Present

PATH · Kenya (multi-site) · available for Nairobi

- Hold clinical and enterprise systems available around the clock across facilities at over 98% uptime, covering the network path end to end: site links, addressing, connectivity to cloud and partner-hosted systems, and the servers behind it.
- Maintain Windows and Linux servers carrying clinical data with backups, encryption, patching and disaster recovery.
- Run system audits, data-flow reviews and risk identification against national standards, working with clinical departments, the ICT team and service providers.

ICT Associate

Jan 2024 to Mar 2025

PATH · Kenya (multi-site)

- Configured and monitored Cisco Meraki access points, switches and security appliances across sites, sustaining roughly 98% availability for 120+ users on staff and guest wireless, wired LAN and inter-site connectivity.
- Administered network security controls: firewall policy, VLAN segmentation, VPN access, MFA and least-privilege identity in Active Directory and Entra ID, endpoint protection and patching, and responded to alerts.
- Installed and supported IP telephony and VoIP, cut incident response time about 25% through ITIL workflows and SLA tracking in Freshdesk, and handled ISP and vendor evaluations with network documentation kept current.

ICT Intern

Apr 2023 to Dec 2023

PATH · Kenya

- Supported LAN and WAN, routers, switches, structured cabling and server-room diagnostics; firewall rules and VLAN segmentation with senior engineers.

EDUCATION **BSc, Applied Computing · KCA University, Nairobi · November 2023**
Cybersecurity and Digital Forensics. Coursework: Ethical Hacking, Digital Forensics, Data Protection, Cloud Computing.

CERTIFICATIONS CCNA · AZ-900 · Google IT Support · IBM Technical Support · GitHub Professional · Microsoft Data Analysis
