3+ yrs	CCNA	~98%	L2 / L3
INFRASTRUCTURE	CERTIFIED	AVAILABILITY	SUPPORT

PROFILE

Infrastructure and cybersecurity engineer with 3+ years at PATH deploying, administering and monitoring ICT infrastructure: Windows Server and Linux, Hyper-V, VMware and Proxmox, LAN, WAN, VPN, firewalls and wireless, at roughly 98% availability. I patch, back up, test recovery, plan capacity, respond to security events, and work second- and third-level under SLA. CCNA, AZ-900, BSc Applied Computing specialised in cybersecurity and digital forensics.

Servers and virtualization Windows Server administration; Linux administration (Ubuntu, Debian, CentOS, Red Hat / Rocky family); physical and virtual servers; Hyper-V, VMware, Proxmox; patching, updates, backups, disaster recovery testing, capacity planning, performance and availability monitoring

Network infrastructure TCP/IP, DNS, DHCP, VLANs, routing and switching; LAN, WAN, VPN and remote access; routers, switches, firewalls and wireless (Cisco Meraki, MikroTik, Fortinet FortiGate); firewall rules and VPN administration

Cybersecurity and access control Network security controls, identity and access control (Active Directory, Entra ID, MFA, least privilege), security event monitoring, incident response, vulnerability assessment and patch management, endpoint protection

Hardware, cloud, automation Servers, storage, desktops, laptops and ICT asset lifecycle; Microsoft Azure (AZ-900), AWS and Google Cloud familiarity; PowerShell, Bash and Python; second-level and third-level support; technical documentation, infrastructure diagrams and operating procedures

EXPERIENCE

Health Informatics / HMIS Officer

Mar 2025 to Present

PATH · Kenya (multi-site)

- Deploy, configure, maintain and optimize Windows and Linux server environments hosting critical systems at over 98% availability, including patching, updates, backups, disaster recovery testing and capacity planning.
- Create, manage and monitor virtual machines on Hyper-V, VMware and Proxmox, and watch server performance, availability and infrastructure health.
- Monitor security events, run vulnerability assessments and access-control reviews, and keep technical documentation, infrastructure diagrams and operating procedures current.

ICT Associate

Jan 2024 to Mar 2025

PATH · Kenya (multi-site)

- Installed, configured and maintained routers, switches, firewalls and wireless infrastructure; supported LAN, WAN, VPN and remote access; administered firewall rules, VPN and network security controls.
- Managed identity and access control in Active Directory and Entra ID, endpoint protection, MFA and patching, and responded to infrastructure-related incidents within SLA, cutting response time about 25%.
- Installed and maintained servers, storage, desktops, laptops and related ICT equipment, kept ICT asset inventories and lifecycle records, and provided second-level and third-level technical support.
- Used PowerShell, Bash and Python for patching, checks and recovery tasks, and took part in infrastructure improvements and Microsoft Azure cloud connectivity.

ICT Intern

Apr 2023 to Dec 2023

PATH · Kenya

- Supported LAN and WAN, routers, switches, cabling, server-room diagnostics, imaging and Linux provisioning with senior engineers.

EDUCATION **BSc, Applied Computing · KCA University, Nairobi · November 2023**
Cybersecurity and Digital Forensics. Coursework: Ethical Hacking, Digital Forensics, Data Protection, Cloud Computing.
