3 yrs	EDR	80+	Kenya
IT SECURITY OPS	MDM SIEM	SETA TRAINED	NO VISA

PROFILE

Information security analyst with 3 years of IT security operations at PATH, an INGO: hands-on administration of EDR, MDM-class endpoint management and SIEM-class monitoring, plus firewall and identity controls in the same family as SASE and CASB. I investigate alerts, run SETA, write policies people actually use, assess risk on systems and data flows, and support Kenya Data Protection Act and GDPR-aligned practice. Kenyan national. BSc Applied Computing, cybersecurity and digital forensics.

Security stack EDR and endpoint protection; MDM-class fleet (imaging, group policy, coverage across a distributed estate); SIEM-class logs, detections and alerting (Grafana, system and security logs); SASE/CASB-class control via identity, VPN and firewall policy (FortiGate, Meraki MX); MFA, IAM, patching

IR, risk, GRC Incident triage, investigation, containment, recovery and post-incident write-up; information and data security risk assessments; vulnerability reporting; ISO/IEC 27001 and NIST CSF control thinking; risk register and assurance evidence; partner due diligence packs

SETA, policy, privacy Security education, training and awareness; onboarding security training; phishing-awareness and higher-risk team sessions; policies, standards and guidelines that get used; Kenya Data Protection Act 2019, GDPR principles (mapping, retention, subject rights); AI governance and acceptable-use controls

Systems and people Internal help desk (Freshdesk, Jira Service Management); Microsoft 365 and Azure; Active Directory / Entra ID; written and spoken English; cross-cultural, multi-site teams

EXPERIENCE

Health Informatics / HMIS Officer

Mar 2025 to Present

PATH · Kenya (INGO, multi-site)

- Own day-to-day security operations on a distributed fleet: EDR coverage, SIEM-class log and alert review, MDM-class device compliance, and identity/MFA policy; investigate alerts and write what changes after the incident.
- Run information and data security risk assessments on systems, vendors and data flows, including health and programme data, and turn findings into actions teams can take inside their timelines.
- Support Kenya Data Protection Act and GDPR-aligned practice (access, retention, evidence) and AI acceptable-use guidance so responsible use is the default; keep an evidence pack for due-diligence questions.

ICT Associate

Jan 2024 to Mar 2025

PATH · Kenya (INGO, multi-site)

- Administered endpoint protection/EDR, patching, MFA and access control; tuned firewall and VPN policy (the control layer next to SASE/CASB); maintained coverage and investigated security events under SLA.
- Designed and ran SETA: onboarding security training, awareness material, and sessions for staff handling sensitive data; 80+ people trained so the policy changed behaviour, not just the slide deck.
- Wrote SOPs and security guidelines that were adopted on the queue; contributed to the control set, audits and the help desk so tooling stayed useful rather than merely deployed.

ICT Intern

Apr 2023 to Dec 2023

PATH · Kenya

- Supported logging, tickets, firewall and VLAN work with senior engineers, and wrote up procedures used in later incident handling.

EDUCATION **BSc, Applied Computing · KCA University, Nairobi · November 2023**
Cybersecurity and Digital Forensics. Coursework: Ethical Hacking, Digital Forensics, Data Protection, Cloud Computing.
