Dear Hiring Team,

I am applying for the Project Coordinator role. For about three years at PATH I have been the person who keeps multi-site work moving: timelines, follow-up, documentation, and a clear status for people who are not in the same room. 120+ users. About 98% uptime. Ticket response about 25% faster because the queue and the write-up were tight.

That is this job. I coordinate tasks across teams, I keep the record, I chase the deadline, and I escalate a risk before it becomes a surprise. I work in Microsoft 365, Google Workspace, Teams, Excel, and status tools (Freshdesk, Jira Service Management). I will live in your project platform from week one.

On the side I run remote projects for small businesses and I shipped a four-county operations platform with documentation attached. I am based in Kenya, fully remote, and I work in English every day.

Thank you.

Sincerely,
Meshack Ariri
