USERS / SITES	UPTIME	ESCALATION / RCA	ON-CALL READY

PROFILE

Tier 3 IT Support and NOC Engineer for a global organisation's Kenya operation: the escalation point when Tier 1 and Tier 2 cannot close it. I monitor infrastructure, isolate whether the fault is routing, switching, identity, endpoint, or the WAN, then I fix it, write the RCA, and change the config so it does not return. SolarWinds, PRTG, Nagios, Zabbix, Cosmos, Grafana. Cisco, Meraki, Ruckus, Aruba, Fortinet, Cisco ASA, WatchGuard. BGP, OSPF, EIGRP, STP, SD-WAN, MPLS, wireless. Wireshark and tcpdump. Microsoft 365, Azure/Entra ID, Active Directory, Windows and macOS. PowerShell and RMM. SIEM/EDR. Diagrams, SOPs, vendors, field technicians. Available for 24x7 operations and on-call.

NOC / monitoring SolarWinds, PRTG, Nagios, Zabbix, Cosmos, Grafana; alert triage, capacity, incident dashboards
Routing / switching BGP, OSPF, EIGRP, STP, VLANs, LAN/WAN, MPLS, SD-WAN, wireless controllers, load balancers
Packets / services Wireshark, tcpdump, TCP/IP, DNS, DHCP, NAT, QoS, VoIP/3CX
Platforms / firewalls Cisco, Meraki, Ruckus, Aruba/HP, Cisco ASA, Fortinet, WatchGuard, MikroTik, VPN
Identity / endpoints Windows, macOS, Active Directory, Azure/Entra ID, Microsoft 365, MFA, patching, firmware
Ops / security RCA, Tier 1/2 escalation, PowerShell, RMM, SIEM/EDR, SOPs, network diagrams, DR, vendors, field techs, PMS/hospitality site ops

EXPERIENCE

Tier 3 IT Support & NOC Engineer

Mar 2025 to Present

PATH · Kenya (Hybrid / Remote) · 24x7 on-call

- Primary technical escalation for Tier 1 and Tier 2 across multi-site infrastructure. Own high-impact incidents through RCA, restore service, and leave the change and the diagram behind. Uptime above 98%.
- Monitor production on SolarWinds, PRTG, Nagios, Zabbix, Cosmos, and Grafana. Act on SIEM/EDR and security-log alerts instead of waiting for a user ticket.
- Diagnose LAN, WAN, MPLS, SD-WAN, and wireless. Routing and switching: BGP, OSPF, EIGRP, STP. Packet analysis with Wireshark and tcpdump. DNS, DHCP, NAT, VoIP, QoS.
- Configure and manage routers, switches, firewalls (Cisco ASA, Fortinet, WatchGuard, Meraki MX), VLANs, VPNs, wireless controllers, and load balancers. Firmware, patching, config change with a backout.
- Support Windows, macOS, Active Directory, Azure/Entra ID, and Microsoft 365. PowerShell and RMM for repeat work. Coordinate vendors and field technicians. SOPs, diagrams, incident reports, DR and capacity notes.

Network Operations Engineer

Jan 2024 to Mar 2025

PATH · Kenya (multi-site)

- Ran network operations for 120+ users across sites: Cisco Meraki, Fortinet, MikroTik, VLANs, VPN, wireless, DNS/DHCP. Ticket response about 25% faster once the queue had a real escalation path.
- Stood up identity and endpoints as part of the same NOC: Active Directory, Entra ID, Microsoft 365, Windows and macOS, MFA, imaging, patching.
- Took the incidents Tier 1 could not close: routing, firewall, WAN, VoIP/3CX. Wrote the RCA and the SOP. Trained 80+ users so noise dropped out of the queue.
- Automation with PowerShell for provisioning, patching, and reporting. Vendor and field-tech coordination when the break needed hands on site.

NOC tooling and automation (project-based)

2023 to Present

Independent · Remote

- Built an operations platform with 40+ REST APIs: incident/NOC tickets, IT asset lifecycle, dashboards, role-based access. Grafana-style visibility so the queue sees the estate, not a spreadsheet.
- Documented configuration, diagrams, and runbooks so the next engineer can take a shift without a handover call.

EDUCATION **BSc, Applied Computing · KCA University, Nairobi · November 2023**
Cybersecurity and Digital Forensics. Coursework: Ethical Hacking, Digital Forensics, Data Protection, Cloud Computing.
