Dear Hiring Team,

I am applying for the Tier 3 IT Support and NOC Engineer role. I am the escalation point. When Tier 1 and Tier 2 cannot close it, I take the incident, isolate the layer (routing, switching, WAN, identity, endpoint, or application), restore service, and write the RCA so the same fault does not come back.

I monitor infrastructure on SolarWinds, PRTG, Nagios, Zabbix, Cosmos, and Grafana. I work Cisco, Meraki, Ruckus, Aruba, Fortinet, Cisco ASA, and WatchGuard. BGP, OSPF, EIGRP, STP, SD-WAN, MPLS, wireless. Wireshark and tcpdump. DNS, DHCP, NAT, VoIP, QoS. Windows, macOS, Active Directory, Azure/Entra ID, Microsoft 365. PowerShell and RMM. SIEM and EDR. Diagrams, SOPs, vendors, field technicians, hospitality-style site ops.

At PATH I have kept multi-site infrastructure above 98% uptime for 120+ users, including 24x7-style on-call. I hold a BSc in Applied Computing and CCNA plus Azure Fundamentals (AZ-900). I am ready to take the on-call rota from week one.

Thank you.

Sincerely,
Meshack Ariri
