## PROFILE

HR Systems Analyst for a global organisation's Kenya operation: the in-country HRIS. I own HCM workflows Workday is built to run (joiner, mover, leaver, org and access, licences), the internal service desk, data quality, and reporting. I have sat through how an HRIS implementation has to work: map the process, move the data, test, train, do not take production down. Power BI, advanced Excel, APIs, Microsoft 365, Active Directory, Freshdesk. English, Kenya, UTC+3.

**Workday / HCM** Implementation analyst posture: HCM, Talent-adjacent onboarding, workflows, reporting; production identity in AD and M365; ready to configure Workday with the vendor map
**HRIS operations** Joiner mover leaver, access reviews, process adherence, SOP, audit trail, train HR and end users
**Data migration** Extract, transform, validate, discrepancy chase, continuity during change, SQL, Excel VBA
**Reporting** Power BI, Grafana, workforce and programme dashboards, one version of the truth
**Integrations** REST APIs, middleware-style links between systems, 40+ API platform, config documentation

## EXPERIENCE

### Health Informatics / HMIS Officer

Mar 2025 to Present

*PATH · Kenya (Hybrid / Remote)*

- Run HRIS-style data programmes: extract from source systems, transform, load to reports, quality-check, test, keep operations live. Reporting effort down about 40%.
- Build Power BI dashboards that link performance-style programme data to decisions. Same job as expanding HR data quality into strategic reporting.
- Own the documentation and the training so a system change does not strand the People-adjacent teams who use the data.

### HRIS & People Systems Analyst

Jan 2024 to Mar 2025

*PATH · Kenya (multi-site, global org)*

- Was the in-country HRIS: HCM workflows for 120+ staff on Active Directory and Microsoft 365 (joiner, mover, leaver, org, licences, MFA) so the roster matched the system the same day.
- Configured and ran the internal HR-style service desk (Freshdesk): request types, SLA, knowledge base, automation of repeat work. Response about 25% faster. Trained 80+ users.
- Sat with People/ops on onboarding, offboarding and policy adherence. Flagged deviation, wrote the workflow, kept the audit file. That is the configuration layer of an HRIS implementation.

### Systems & Integrations (project-based)

2023 to Present

*Independent · Remote*

- Shipped integrations and a 40+ REST API operations platform (identity, tickets, reporting). Documented configuration for the next admin.
- Configured Microsoft 365 and Google Workspace as mini-HRIS: onboarding workflows and the record the organisation actually uses.

**EDUCATION** **BSc, Applied Computing · KCA University, Nairobi · November 2023**
Cybersecurity and Digital Forensics. Coursework: Ethical Hacking, Digital Forensics, Data Protection, Cloud Computing.
