MESHACK ARIRI

Career Dossier · Experiences, certifications, capabilities & CV design

Kisumu, Kenya · +254 741 174 779 · aririmeshack@gmail.com
linkedin.com/in/meshack-ariri · meshreallycodes.online

120+ users supported	**~98%** uptime held	**80+** staff trained	**50+** facilities on site

PROFILE

Health Informatics and IT professional with ~3 years at PATH supporting national-scale health information systems — KenyaEMR/TaifaCare, DHIS2, and EMR–laboratory–pharmacy integrations. Combines hands-on EMR/HMIS support with data quality (DQA, SQL validation), analytics (Power BI, Grafana), and reliable IT operations (Microsoft 365, Active Directory, networking, ITIL/SLA) for 120+ users across multiple sites. Center of gravity: keep the digital systems that run Kenyan healthcare working, and help the people who use them succeed.

SKILLS

Health systems: KenyaEMR / TaifaCare, OpenMRS, DHIS2, NDWH, PRISM (PATH project DB), Kobo
Data & MIS: DQA, SQL, Power BI, Tableau, Grafana, Metabase, Excel (Power Query / VBA), digital + manual MIS
IT operations: M365, AD / Entra ID, Meraki, Freshdesk / Zoho / Jira, Windows / Linux servers, backups / DR
Delivery: Facility rollout, SOPs / job aids, training, vendor / ISP coordination, Asana / MS Project / Monday.com
Build: Next.js, TypeScript, Prisma, MySQL, REST APIs, Recharts / Mapbox

IDENTITY SNAPSHOT

Phone	+254 741 174 779
Email	aririmeshack@gmail.com
Location	Kisumu, Kenya (open to relocate / remote)
Languages	English, Swahili, Dholuo
LinkedIn	linkedin.com/in/meshack-ariri
Portfolio	meshreallycodes.online
Employer	PATH — write PATH only; never the wrong expansion
Level	Mid-junior → mid; niche depth in health IT / programme MIS
Salary note	KES 105,000 gross / month + medical + house allowance (as typed on BRAC form)

EMPLOYMENT TIMELINE

Official PATH HR titles below. Programme workstreams are not separate employers.

Health Informatics / HMIS Officer

Mar 2025 – Present

PATH · Kisumu / Nyamira (Hybrid)

- Support and stabilize KenyaEMR / TaifaCare and DHIS2 across facilities; install and upgrade KenyaEMR on site.
- DQA and SQL validation; Power BI / Tableau / Grafana / Metabase dashboards; NDWH API reporting workflows.
- Support EMR–lab–pharmacy data flow; maintain Windows / Linux servers hosting EMR data (backups, patching, DR).
- Train facility staff and program teams; produce SOPs, job aids, and uptime / progress reports for managers and county teams.

ICT Associate

Jan 2024 – Mar 2025

PATH · Kisumu

- 1st/2nd-line IT for 120+ users; Freshdesk / Zoho / ITIL SLAs; ~98% uptime; M365, AD / Entra ID, Meraki, VoIP / 3CX.
- Field ICT for OVC and DREAMS: devices, connectivity, data tools and reporting for mentors and case workers.
- Mentored youth and trained ICT hubs; wrote job aids so tools were used after the session.
- Salesforce ticket support for PATH users (login / access / forms) — not tenant admin, not Taroworks.

ICT Intern

Apr 2023 – Dec 2023

PATH · Homa Bay

- LAN / WAN, imaging, VoIP, facility digitalization, ticketing under SLA.
- Assisted server-room audits; shadowed senior engineers on firewall rules, VLANs, and Linux provisioning.

IT Assistant — Indoor Residual Spraying (IRS) Campaign

2023 · ~2 months (before PATH)

Homa Bay County · one campaign only

- Short-term field IT. Tool on record: ODK / Kobo Collect.
- Do not claim DHIS2, GPS cleaning, device fleet setup, or spray-tracker ownership unless confirmed. Not “1 year of IRS.”

PROGRAMME WORKSTREAMS UNDER PATH

ECD Programme MIS & ICT Support

2024 – 2025 · Closed · Remote

- Ran digital and manual MIS until close-out: Kobo, tablets, logins, sync by phone and chat, Excel trackers, Power BI packs, onboarding, hard-copy and digital backups.
- Never write as Nuru ya Mtoto current role or as a second employer.

OVC · DREAMS · Youth mentoring / ICT hubs

During ICT Associate

- OVC / DREAMS: field ICT only — devices, connectivity, data tools. Not programme manager, social worker, or DREAMS coordinator.
- Youth mentoring: trained 10 people in self-awareness over two months; 3 went on to start businesses or secure jobs (confirm context before use outside PATH youth work).

WHAT I CAN DO

Health information systems

- Install, upgrade, and stabilize KenyaEMR at facilities; biometric scanners for patient ID; UPS / power backup; tablets and phones for field teams.
- DHIS2 support; PRISM as PATH project database beside DHIS2 (not Prisma ORM; not “PRISM equals DHIS2”).
- 50+ health facilities supported on site across 3–4 counties; KenyaEMR rollout schedule and per-facility tracker.

Data quality, MIS & analytics

- DQA and SQL validation; Excel (Power Query, pivots, VBA); Power BI, Tableau, Grafana, Metabase.
- Digital + manual MIS (registers, Kobo, Excel). Cut reporting grind ~40% where automation held.
- Interview posture: start from how the field enters → clean → sample against source → then publish the dashboard.

IT operations & service desk

- ~20 tickets/week average; ~25% faster response when queue discipline tightened (confirm before reuse on GreenWheels-style packs).
- 7 offices; 250+ devices imaged and set up; physical and remote servers; licence cleanup (no invented savings figure).
- Restores after outages as soon as possible — no measured restore-time SLO; do not invent one.

Enablement & delivery

- 80+ staff trained across 15+ sessions; remote first-line for ECD field staff by phone and chat.
- Organised equipment, materials and transport; raised purchase requests; scheduled contractors and signed off work.
- Valid driving licence. Tools: Excel / Sheets trackers, Asana, MS Project, Monday.com, Jira.

FLAGSHIP PROJECT

County Health Systems Operations Platform (NDWH & CBS)

Portfolio

Independent full-stack build · Kakamega, Vihiga, Nyamira, Kisumu

- Monitors facility reporting (NDWH vs CBS), EMR deployments, IT assets and incidents across four counties.
- Stack: Next.js 14, TypeScript, Prisma ORM, MySQL (Aiven), 40+ REST APIs, Recharts / Mapbox, auth and roles.
- Proves product ownership, data modeling, health reporting logic and ops thinking — not only ticket closing.

EDUCATION

BSc, Applied Computing · KCA University, Nairobi · November 2023

Specialization: Cybersecurity and Digital Forensics. Coursework: Ethical Hacking, Digital Forensics, Data Protection, Cloud Computing, System Analysis & Design, Artificial Intelligence. Capstone: designed and implemented a secure office network (VLANs, Active Directory, backup and disaster recovery).

CERTIFICATIONS & SPECIALISED TRAINING

Verification rule: Confirm CCNA and AZ-900 as exam cert vs course completion before every submission. Never invent PMP, PRINCE2, or Certified Scrum Product Owner as completed.

- Cisco Certified Network Associate (CCNA) — verify exam vs NetAcad
- Microsoft Certified: Azure Fundamentals (AZ-900) — verify
- Google IT Support Professional Certificate (Coursera, 2023)
- IBM Technical Support Certificate (Coursera, 2023)
- GitHub Professional Certificate (2024)
- Microsoft Data Analysis (Microsoft + LinkedIn, 2024)
- DHIS2 Academy certificate (write exactly that way)
- Cyberise Hackathon Certification (CA Kenya with Huawei, 2022)

- National Research Fund Hackathon Certification (2024)
- Cyber Shujaa cybersecurity programme (Serianu / KBA / USIU-Africa) — participation only, not a prize
- Google Project Management Certificate (Coursera) — started Oct 2026, in progress only
- Scrum Product Owner — pursuing / in progress if enrolled; never “certified” until passed

CAPABILITY MAP

Programme MIS	Lead for BRAC TSO-MIS / MEL / HMIS — DHIS2, KenyaEMR, PRISM, Excel/Kobo, ECD MIS close-out
EMR / HIS rollout	Strongest Kenya differentiator — facility installs, 50+ sites, biometrics, UPS, tablets
Data quality	DQA, SQL, dashboards — start from field entry, not the chart
IT / systems ops	Default remote / university / NGO ICT — 120+ users, M365, AD, Meraki, ~98% uptime
Training / adoption	80+ staff, job aids, remote ECD support — own this aloud in MIS interviews
Product / platform	NDWH & CBS ops platform — use when they want builders, not only operators
Vendor / partners	ISP / vendor evals, contractor sign-off — not Salesforce tenant admin
AGYW adjacency	DREAMS field ICT, youth mentoring, ECD MIS — bridge without overclaiming

NEVER CLAIM / VERIFY FIRST

Do not invent

BInsight admin · CommCare · ONA · Stata / SPSS · Salesforce tenant admin / Taroworks · PMP / PRINCE2 / CSPO completed · living in Nairobi · Nuru ya Mtoto as current ECD title · 1 year of IRS · POS / access control / solar · restore-time SLOs · licence-savings money figures.

Verify before leading

Nessus / OpenVAS / Carbon Black depth · “managed Meraki globally” · full interoperability lead claims · CCNA / AZ-900 exam vs course · any salary figure not already typed on a form.

Tone on tools: Never write “I have not used X.” Frame unfamiliar tools by the job they do and systems already run. Gaps live in Application_Intelligence for interview prep only — not on the CV or cover letter.

CV DESIGN SYSTEM

Shared theme: resumes/resume_theme.py. Builders: build_resumes.py (DOCX), pdf_builder.py (PDF). Facts: resumes/00_Master_Resume.md. This dossier uses the same navy / copper editorial light look.

Visual standard

Look	Light editorial — navy type on white. No full-width dark header block
Name	Navy #0F2744
Accent	Copper #C45C26 — hairline, toolkit labels, bullets, metric values
Washes	Sand #F6EFE6 (chips / toolkit); Cream #FBF7F2 (faint fill); soft copper #E8C4A8 dividers
Body	Slate #1E293B; muted dates / contact #64748B
Fonts	DOCX: Calibri · PDF: Helvetica (ATS-safe, selectable text)
Layout	Single column · real text · no photo · no icons · no skill bars

Page structure (top → bottom)

- **Header** — MESHACK ARIRI · tailored headline · contact. Navy name, copper hairline.
- **Metric chips (optional)** — value + caption on one line so parsers read in order (e.g. “120+ users supported”).
- **Professional summary** — 4–6 lines tailored to the JD; lead with the job’s language; no apology gaps.
- **Skills toolkit ribbon** — labelled clusters ending with a colon; small copper SKILLS label inside the ribbon. Never a big “Core Skills” heading.
- **Professional experience** — PATH roles (+ workstreams when needed). Title bold · dates right · org muted · copper bullets.
- **Credentials strip** — education + certifications together, full-width cream / copper. Never a two-column footer.
- **Achievements / languages / referees** — as needed per pack; keep short.

Pack file conventions

- Folder: applications/Employer Role/ — spaces; no “Role - Employer” hyphens.
- Always output: Meshack Ariri CV.pdf/.docx · Meshack Ariri Cover Letter.pdf/.docx.
- Combined upload: cover letter first, page break, then CV.
- Source: Job_Description.md · Application_Intelligence.md · Portal_Application_Pack.md · build.py.
- Generated CVs stay in the pack folder (gitignored there). Use build_resumes.pack_files(HERE).

Approved CV variants

IT Ops / Systems (default survival) · Health Informatics / HMIS · INGO ICT Officer · Programme MIS (BRAC TSO-MIS style) · Stretch packs in stretch/ (hard-positioned).

POSITIONING STRATEGY

- **Front door:** Health Informatics / EMR–DHIS2 / programme MIS when the JD fits.
- **Volume engine:** Remote IT Support & Systems Ops (M365, AD, networking, ticketing) with health systems as proof of seriousness.
- **Usually skip:** Web / Webflow, TA / HR, pure CRM, L1 voice CX, non-health MEL unless entry-level and data-heavy.

Canonical facts: resumes/00_Master_Resume.md · Skills: 02_Skills_Intelligence.md · Profile: 01_Career_Profile.md. Update Master Resume first when any fact changes, then rebuild packs.
