

EDUCATION

KCA University

Nairobi, KE

November 2023

- Bachelor of Science in Applied Computing
- Related Coursework: Artificial Intelligence, Cloud Computing, System Analysis and Design
- Capstone Project: Designed and developed a web-based educational platform to teach cybersecurity awareness and digital forensics concepts to peers using structured learning modules and user-friendly navigation.

EXPERIENCE

Program Appropriate for Technology in Health (PATH)

Hybrid

ICT Support Specialist (Current Role)

- Support enterprise web-based applications, digital platforms, and cloud systems used by 120+ users, ensuring system reliability, usability, and continuous service delivery
- Build, maintain, and troubleshoot digital workflows across enterprise systems including Microsoft 365, internal applications, and web-based services
- Design and support functional improvements for user-facing systems by analyzing user requirements and translating them into technical solutions
- Administer Active Directory and identity systems, managing user access, authentication flows, and system permissions across multiple platforms
- Support Microsoft 365 cloud environment including Outlook, Teams, SharePoint-based workflows, and integrated communication systems
- Diagnose and resolve issues across web-based applications, APIs, network services, VPN access, and system integrations affecting user workflows
- Perform system validation, functional testing, and quality assurance to ensure digital systems and applications perform as expected after updates or fixes
- Maintain structured documentation of system behavior, bugs, recurring issues, and workflow improvements for continuous optimization
- Support secure digital environments including MFA, endpoint protection, and access control systems across enterprise platforms
- Troubleshoot network and system integration issues across LAN/WAN, DNS/DHCP, and cloud-connected applications
- Use PowerShell, Bash, and Python scripting for automation, system integration support, and operational efficiency

Program Appropriate for Technology in Health (PATH)

Hybrid

IT Service Desk Technician (Applications)

April 2023- December 2024

- Designed and developed a web-based inventory management system to track stock, users, and transactions within an organizational workflow
- Implemented backend logic and database structure to support CRUD operations, data integrity, and real-time inventory tracking
- Built user interfaces and system workflows to enable efficient interaction between users and system data
- Integrated system logic to support reporting, tracking, and operational decision-making within a business environment
- Performed system testing, debugging, and iterative improvements to ensure reliability and usability

SKILLS

Web & API Projects

- Built and deployed multiple websites using different technologies, focusing on functional design, system structure, and usability
- Implemented APIs to connect services, extend functionality, and enable data exchange between applications
- Worked on system integration tasks including authentication flows, data handling, and external service connectivity
- Applied debugging and troubleshooting techniques to improve performance, stability, and user experience of web applications

AI Website and Platform Operations

- Ability to work with structured digital systems and refine outputs based on requirements
- Experience validating system functionality and performing quality assurance testing
- Strong attention to detail in reviewing system behavior, usability, and interface consistency
- Ability to interpret client and system requirements and translate them into functional outputs

Cybersecurity & Endpoint Management

- Endpoint protection (antivirus, patching, compliance support)
- Multi-Factor Authentication (MFA) and secure access management
- Cybersecurity fundamentals and awareness enforcement
- Basic incident response support and vulnerability reporting
- Cybersecurity exposure strengthened through **Communications Authority of Kenya**

Cybersecurity Hackathon Certification

REFEREES

Available upon request
