

EDUCATION

KCA University

Nairobi, KE

- Bachelor of Science in Applied Computing
- Related Coursework: Artificial Intelligence, Cloud Computing, System Analysis and Design, Ethical Hacking, Criminology, Data Protection
- Capstone Project – Enterprise Network & Support Workflow System
- Designed a secure enterprise network simulating IT support environments, including user access management, role-based controls, VLAN segmentation, and structured issue documentation workflows.

November 2023

EXPERIENCE

Program Appropriate for Technology in Health (PATH)

Hybrid, KE

Technical Support Specialist (HMIS)

March 2025- Present

- Supported healthcare system users across EMR platforms (KenyaEMR, TaifaCare, DHIS2), using structured troubleshooting and communication to resolve user issues in real-time environments
- Identified recurring system and user interaction patterns, using analytical tools and AI-assisted review methods to improve documentation consistency and issue categorization
- Documented incidents, system behavior, and resolution steps, leveraging AI-assisted tools (e.g., writing and summarization tools) to improve clarity and structure of technical reports
- Reviewed system logs, incident reports, and user feedback to support root cause analysis and improve resolution accuracy
- Generated structured operational reports on system performance and incident trends, using AI-assisted tools for summarization and data organization
- Collaborated with cross-functional teams to improve system usability and streamline support workflows across healthcare applications

Program Appropriate for Technology in Health (PATH)

Hybrid, KE

ICT Associate

Jan 2024- March 2025

- Provided first- and second-line support for 120+ users, delivering clear and structured responses to technical issues in high-volume environments
- Managed support tickets using Freshdesk, ensuring accurate categorization, tracking, and documentation of user interactions and issue types
- Used AI-assisted tools (e.g., ChatGPT, Microsoft Copilot where applicable) to support drafting of responses, documentation improvement, and knowledge base creation
- Identified recurring user issues and support patterns, contributing to improved troubleshooting guides and structured response templates
- Created and refined support documentation and knowledge base articles using AI-assisted writing and summarization tools to improve clarity and consistency
- Delivered step-by-step user guidance, adapting communication style based on user technical level and support context

SKILLS

- Structured Communication in Technical Environments
- Workflow Coordination & Process Management
- Stakeholder Communication & Support
- AI-assisted Writing & Summarization
- AI-supported Knowledge Base Development
- AI-assisted Problem Solving & Research
- Interaction Pattern Recognition
- Support Data Structuring & Categorization
- Quality Review of Support Responses
- Knowledge Base Development & Improvement
- Process Documentation & Optimization
