Re: Application – Application for ICT Consultant Position

Dear Hiring Committee,

I am writing to express my interest in the ICT Consultant position at The Green Belt Movement. I hold a background in Information Technology and have hands-on experience supporting ICT systems, end users, infrastructure, and digital platforms in organizational environments.

Through my experience in IT support and systems administration, I have worked on user support, troubleshooting hardware and software issues, managing system access, supporting server and network environments, and maintaining reliable ICT operations. I have also supported cloud-based services, backup processes, device setup, and general infrastructure maintenance while ensuring timely issue resolution and service continuity.

I am particularly interested in this opportunity because it combines technical support, infrastructure management, and system reliability in a mission-driven organization. I believe my practical ICT support experience, problem-solving ability, and commitment to dependable service delivery would enable me to contribute effectively to your team.

I would welcome the opportunity to further discuss my suitability for this assignment. Thank you for your time and consideration.

Yours sincerely,
Meshack Ariri

EDUCATION

KCA University

Nairobi, KE

November 2023

- Bachelor of Science in Applied Computing
- Related Coursework: Artificial Intelligence, Cloud Computing, System Analysis and Design, Ethical Hacking, Criminology, Data Protection
- Capstone Project – Designed and implemented a secure office network with VLANs, Active Directory, and backup protocols to simulate real-world IT administration. Demonstrated hands-on skills in server setup, user access control, and disaster recovery planning.

EXPERIENCE

Program Appropriate for Technology in Health (PATH)

Kisumu, KE

HMIS

March 2025- Present

- Implemented cybersecurity monitoring across EMR systems (KenyaEMR/TaifaCare, DHIS2) to detect and resolve incidents in real time.
- Conducted vulnerability assessments, applied security patches, and audited databases, VPNs, and application servers against compliance standards.
- Maintained and secured Windows/Linux servers hosting sensitive EMR data, ensuring backups, encryption, and disaster recovery protocols were in place.
- Developed and delivered cybersecurity awareness training for 80+ healthcare workers, focusing on phishing prevention and secure system use.
- Investigated security incidents, performed root cause analysis, and documented digital forensic findings for escalation.
- Generated weekly/monthly reports on EMR system uptime, incident response metrics, and IT security posture.
- Supported rollout of secure integrations between EMR, laboratory, and pharmacy systems, applying data protection policies.
- Oversaw IT asset management and implemented access controls to strengthen accountability and compliance.

Program Appropriate for Technology in Health (PATH)

Kisumu, KE

ICT Associate

Jan 2024- March 2025

- Logged and tracked incidents in Freshdesk following ITIL workflows, escalating unresolved security issues to SMEs.
- Provided first- and second-line IT support for 120+ users, achieving >98% system uptime while ensuring secure system access and data protection.
- Configured and managed Cisco Meraki network devices globally, including access points, switches, and security appliances, providing secure and reliable connectivity for users across multiple countries.
- Monitored and optimized international network performance via the Meraki dashboard, troubleshooting connectivity issues, enforcing security policies, and supporting end-user network access across diverse regions.
- Installed, configured, and maintained Windows 10/11 PCs, laptops, VoIP devices, and Office 365 apps (Outlook, Teams, SharePoint), applying security baselines.
- Performed Active Directory administration, enforcing account provisioning, access rights, and group policies aligned with least privilege.
- Administered endpoint security using VMware Carbon Black, monitoring and responding to threats in real time.
- Conducted routine Linux server maintenance, applied patches, and monitored vulnerabilities using scanning tools.
- Participated in penetration testing exercises and ran incident response drills to evaluate and strengthen organizational security posture.
- Delivered user awareness training sessions on phishing prevention, password hygiene, and safe data handling.
- Generated weekly SLA compliance reports and IT asset inventory updates, highlighting risk mitigation measures.
- Documented incidents, resolutions, and preventive actions in a knowledge base to improve future response and resilience.

Program Appropriate for Technology in Health (PATH)

Kisumu, KE

ICT Intern

April 2023- December 2023

- Supported maintenance of LAN/WAN networks, routers, switches, and structured cabling.
- Assisted in server room audits, diagnostics, and system performance monitoring.
- Helped deploy and configure printers, VoIP phones, and desktop imaging tools (PXE boot).
- Created and tracked tickets in Freshdesk, supporting ITIL-based workflows and SLA monitoring.
- Shadowed senior engineers on firewall rule changes, VLAN segmentation, and Linux server provisioning, gaining hands-on cybersecurity exposure.
- Contributed to process documentation, internal IT audits, and compliance requirements.
- Participated in cybersecurity hackathons, webinars, and training workshops, enhancing knowledge of penetration testing, digital forensics, and emerging cyber threats.

SKILLS AND ACTIVITIES

- System Administration – Windows Server 2016/2019/2022, Active Directory, Group Policy, Linux basics (Ubuntu/CentOS).
- Networking – LAN/WAN setup, VPNs, VLANs, firewall configuration, performance tuning.
- Collaboration Tools – Microsoft Teams, Outlook, SharePoint, Office 365 suite.
- Cybersecurity – Endpoint protection, vulnerability scanning (Nessus, OpenVAS), incident response.
- Cloud & DevOps – Microsoft Azure (certified), cloud deployments, Git/GitHub workflows.
- Automation & Scripting – PowerShell, Bash, Python.
- Virtualization & Backup – VMware, Hyper-V, Veeam, rsync, disaster recovery planning.
- Asset & Inventory Management – IT hardware lifecycle tracking and reporting.

ACHIEVEMENTS

- **Cyber Rise Hackathon** (Huawei, 2023): Competed in a national-level cybersecurity hackathon focused on incident response, penetration testing, and cloud security.
- **National Research Fund Cybersecurity Challenge** (Gov't of Kenya, 2024): Participated in a government-organized cybersecurity drill, simulating real-world attacks and defense strategies.
- **Blockchain Security Hackathon** (CP Hub, 2024): Explored vulnerabilities in blockchain-based applications and contributed solutions for secure smart contracts.
- **Campus Innovation Weeks & Hackathons** (KCA University, 2022–2023): Developed and tested security-driven projects, strengthening skills in digital forensics, vulnerability assessments, and secure app development.
